TRAINING COURSE IN MALAYSIA

In the last week of May our specialist trainer Norman MacIver delivered training in warehouse operations and optimisation in Kuala Lumpur for 22 international delegates.

During this five day Warehouse Operations and Optimisation training course, the participants explored ways to meet the needs of their warehousing in light of the new economic landscape they faced. They were introduced to a holistic approach to warehouse workflow and processes, and offered solutions to remove systemic inefficiencies in their warehousing. This led to their discovering how market position can be enhanced by the range and quality of the services they each provide.

Participating in the training were delegates from: Oman, Sudan, Saudi Arabia, Bahrain, Abu Dhabi, Qatar and the United Arab Emirates.
